Please do not advertise this but I'm working away on a lengthy addressing of the Livingstone killing of the truth. In book form but no likely interest as a book. I am learning more and more missing, and this I suspect but will never be able to prove was by the cop working for him because it could be devastating to what they were up to as I have in reduced form on the book, that crap fed them by Rothenmel et al.

All my H.L. Hunt stuff is missing, as is most of my Patchen file and all the things I had of those firings and charges with stealing.

In my King file for I found a letter you got from DJ that makes a references to some charges being filed. But I'd like as a minimum some newspaper stories on those men tried and charged as thieves. I believe Currington is among them. *Notations in King's stuff*  
*Done of need.*

If Hirschkopf still represents the song or had a friendly relationship with them there may be some interest in what I am doing in haste. Livingstone was pretty nasty about the old man and about them. I'm rushing; but I've got about 30,000 unread words on paper. I'm addressing what he wrote about me right now.

Please thank Jonathan for the package here today. The Posner stuff is along the line I was expecting and am glad to have. I'd like to know whose notes they are on that Lexis stuff if he knows. Please tell him also that through Korgly I got a message to Newman. I think you may recall some ways in which I might help him and that he says what I've been so alone in saying for so many years! Glad to have your prepared statement and will read it and the rest he sent when I can. I did not know there were such hearings or that Congress is the chairman. I think I'm in a position to make an authentic sensation of them but as you know, I can't get there. If as I hope Newman can come up I'll discuss it with him. Great Horley story! Hoping to get copies for DW and others.

What is interesting in these disappearances is that when I thought I might have some in the old Ray file, which is physically separated and I never explained to those with MK interests, a fat file remains there. But it is not on the arrests. Only on the Foreman part, the wiretapping case. I have a few hours of a Hood student who had the legs. She does not and she has been a good searcher. A blessing now!

Please also tell Jonathan, who says the Archives told him all the Z negatives are black and white and do now show the sprocket-hole material that the original slides prepared by LIFE are in color and do have that material and to please copy from them. If you question it, please suggest to them that they look at CE 385. Or just show this to him again, please thank him and I remain interested in P's former <sup>clients</sup> ~~legitimate~~ clients if they can be located. This Lexis stuff has him with different explanation for no case & the late and does suggest what I suspect, that he used that to get the book. Who paid?

Best

*Harvey*
